PROFESSIONAL SUMMARY

Software developer with hands-on experience in .NET 8, ASP.NET Core MVC, C#, SQL Server, Windows Services and full-stack web development. Built AI-enabled applications and agent workflows using Python, LangGraph, React and LLM integrations. Experienced in REST APIs, debugging, database operations, Git-based collaboration and testing.

TECHNICAL SKILLS

Languages C#, Python, JavaScript, TypeScript, SQL, HTML, CSS

Backend & Databases .NET 8, ASP.NET Core MVC, ASP.NET Core Web API, ADO.NET, REST APIs, Windows Services, SQL Server, MongoDB, Supabase

Frontend React, Blazor WebAssembly, Razor Views, Tailwind CSS, Bootstrap

AI & Automation LLM application development, LangGraph, AI agents, prompt engineering, workflow orchestration, AI-assisted development

Tools & Practices Git, GitHub, GitHub Actions, Docker, Postman, Visual Studio, VS Code, debugging, API testing

PROFESSIONAL EXPERIENCE

Junior .NET Developer — NeoLotex Business Solutions | Aug 2026 – Present

- Develop and maintain application features using .NET 8, ASP.NET Core MVC, C# and SQL Server.
- Work with Windows Services and database-backed workflows; troubleshoot application behavior and support maintenance.

Data Engineering Trainee — Innverse Tech | Feb 2026 – May 2026

- Converted legacy SAS transformations to PySpark pipelines and validated data outputs against source logic.
- Developed and maintained Apache Airflow DAGs for scheduling, dependencies, retries and pipeline troubleshooting.

Software Engineering Trainee — Wise Work | May 2025 – Jan 2026

- Developed HueLearn platform features using C#, ASP.NET Core Web API, Blazor WebAssembly and REST integrations.
- Implemented learner-facing and course-management workflows; investigated issues across UI, API and data layers.

SELECTED PROJECTS

AutoDev Agents — AI Software Development Pipeline | Python, LangGraph, LLM APIs

- Built a 17-agent workflow that converts Markdown specifications into code, tests and documentation, with automated review, browser checks and approval before GitHub publishing.

Kelvra — AI Study Application | React, Vite, Supabase, Groq, Vercel

- Created an AI learning app that transforms notes, PDFs and photos into flashcards, quizzes, summaries and study plans; secured model requests behind a server-side API.

Lead Finder — AI-Assisted Business Research | Python, Supabase, GitHub Actions

- Built a pipeline to discover local businesses, audit website quality and generate fact-grounded sales briefs; automated daily lead delivery with GitHub Actions.

Employee Management System | ASP.NET Core MVC, ADO.NET, SQL Server

- Developed an employee CRUD application with session-based login, form validation and a Bootstrap interface.

EDUCATION & CERTIFICATIONS

B.E., Industrial Engineering & Management | Siddaganga Institute of Technology | 2024

Advanced Certificate in Data Science (Deep Learning) | IIIT Bangalore | 2025

.NET Full Stack Developer Certification | Palle Technologies | 2025
